

THE AVENGERS

The graph speaks for itself. We can see the top appearances in the Avengers are ALL MALE till date. The lighter colour bars being female is so very less. In a world that fights for gender equality, it is a matter of absolute shame that this issue has to still be brought up!

Women representation in Avengers

Let the record speak for itself: Marvel put out 20 movies with male protagonists, many of them brain-meltingly similar to one another, before releasing its first built around a female superbeing. That 2019 movie, Captain Marvel, was also the first Marvel movie with a female director in co-helmer Anna Boden and only the second with female screenwriters in Boden and Geneva Robertson-Dworet.
